WORK EXPERIENCE

Software Engineer

ThirdEye Gen

Develops AR/VR Glasses

Achievements/Tasks

- Recreate Wordpress site to utilize less plugins, dynamically render images, and increase average time on page with Gatsby.js.
- Maintain web content to best align with the company's current events and promotions. Allowed for quicker turn around times on content changes.
- Assist marketing team create video content, and product photography. Helped team keep up with fast-paced social media content delivery.
- Create feature canvasses to help manage expectations and turnaround times for objectives. Used Trello to demonstrate real-time progress and organize teamwork.

IT Analyst

Burlington Coat Factory

Achievements/Tasks

- Recreate the IT Portal page using HTML, JavaScript, and CSS. The page used daily by over 600+ stores and thousands of employees throughout the US and Puerto Rico.
- Run SQL queries to analyze and troubleshoot hardware/software errors reported by the POS(point of sale) devices, then use the information to accurately troubleshoot remotely with, or without store staff.
- Responsible for medium-level administrative and technical support functions for store technology and 3rd party software used by internal staff.
- Maintain, review, and approve knowledge base documentation.
- Use Cisco Network knowledge to find, understand and troubleshoot switch/server and Cradlepoint based infrastructures. Collaborate with IBM, Acumatica NOC, and Centurylink to best address any emergency.
- Update and maintain the information, links, and documents found on the Intranet page. Working closely with many departments to optimize site loading times by 60%.
